Illustrative Home Water-Backup Endorsement

IMPORTANT NOTICE

DEMONSTRATION DOCUMENT ONLY. This fictional sample is for testing document ingestion and retrieval. It is not an insurance contract, does not provide coverage, and must not be used to make a claim or purchasing decision.

1. Covered event

Subject to the base policy and all exclusions, this sample endorsement applies to direct physical loss caused by a sudden, accidental discharge or overflow of water from a drain, sewer, sump, or sump pump located at the insured residence.

2. Limit and deductible

The maximum limit for covered water-backup cleanup and covered direct physical damage is $7,500 per occurrence. A $500 deductible applies to each occurrence. The limit is not an amount payable automatically; covered loss, documentation, and all policy terms determine payment.

3. Exclusions

Flood or surface water, groundwater seepage, gradual leakage, repeated seepage, wear and tear, and failure to maintain the sump system are not covered by this illustrative endorsement. Mold remediation is excluded unless separately stated in a written endorsement.

4. Duties after loss

Take reasonable steps to protect property from further damage, keep receipts, photograph the damage, and report the loss promptly. This sample text does not change any notice deadline or duty in an actual policy.

5. Questions answered by this sample

The sample cleanup limit is $7,500 per occurrence. The sample deductible is $500. Sudden covered backup can qualify subject to the terms; flood and gradual seepage are excluded.
